Applicant								
LG ELECTRONICS INC.	· .							
This international search report has bee according to Article 18. A copy is bein	on prepared by this International Searching Auggransmitted to the International Bureau.	thority and is transmitted to the applicant						
This international search report consist	s of a total of 4 sheets.							
It is also accompani	ed by a copy of each prior art document cited	in this report.						
1. Basis of the report								
a. With regard to the language, language in which it was file	the international search was carried out on the ed, unless otherwise indicated under this item	basis of the international application in the						
the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).								
b. With regard to any nucleotid search was carried out on the	le and/or amino acid sequence disclosed in the basis of the sequence listing:	ne international application, the international						
contained in the internat	contained in the international application in written form.							
filed together with the international application in computer readable form.								
furnished subsequently to this Authority in written form.								
furnished subsequently t	to this Authority in computer readable form.							
the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.								
the statement that the integral been furnished.	formation recorded in computer readable form	is identical to the written sequence listing has						
2. Certain claims were fo	und unsearchable (See Box I).	·						
3. Unity of invention is la	cking (See Box II).							
4. With regard to the title,	•							
the text is approved as si	ubmitted by the applicant.	·						
the text has been established	shed by this Authority to read as follows:							
5. With regard to the abstract,		·						
the text is approved as so	ubmitted by the applicant.							
the text has been establis within one month from	shed, according to Rule 38.2(b), by this Author the date of mailing of this international search	rity as it appears in Box III. The applicant may, report, submit comments to this Authority.						
6. The figure of the drawings to be	published with the abstract is Figure No.:1							
as suggested by the appl	icant.	None of the figures.						
because the applicant fa	iled to suggest a figure.							
because this figure bette	r characterizes the invention.							
Form PCT/ISA/210 (first sheet) (July 1	998)							

#### INTERNATIONAL SEARCH REPORT

International application No. PCT/KR 03/01374-0

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

A reciprocating compressor includes a driving unit (10) disposed inside a hermetic container 86) and generating a reciprocal motional force, a compression unit (10) for performing a compressing operation on a refrigerant upon receiving the reciprocal motional force generated from the driving unit (8); and a lubrication unit (12) for supplying a lubricant to each motional portion of the driving unit (8) and the compression unit (10) to perform a lubrication operation. Hydrocarbon consisting of carbon and hydrogen, a sort of natural refrigerant, is used as the refrigerant. The lubricant is a paraffin-based mineral lubricant, which is a sort of mineral oil and well harmonized with the natural refrigerant used for a refrigerator. Accordingly, a lubricating performance is improved and thus a performance of the reciprocating compressor can be enhanced.
